

Uprise

An end-to-end solution designed to meet the unique needs of multi-dwelling units for fast and secure connectivity

Multi-dwelling units (MDUs) make up over a quarter of today's housing market and demand is still on the rise

Today's property management companies face challenges with inefficient, ad-hoc infrastructures, and fragmented solutions. This leads to poor or inconsistent internet performance, expensive build-outs for property locations, and outdated experiences for tenants.

Leverage the adaptive MDU suite designed to deliver the connected lifestyle tenants have come to expect

Uprise creates a single managed entity for residential, commercial, and common living spaces alike.

Key features

MDU optimization

A learning algorithm that optimizes clusters based on peak usage time and need.

Property wireless connectivity

Provide community access to guests and tenants throughout the property while managing a private SSID for building-owned devices.

Personalized tenant experience

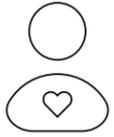

Enable tenants to manage their network experience using Plume's intuitive award-winning app interface.

Tenant lifecycle management

APIs enable seamless network monitoring and management across multiple properties.

Key benefits

Increase customer lifetime value

Deliver a premium experience to your tenants with the industry-leading, HomePass and WorkPass apps.

Reduce cost and complexity

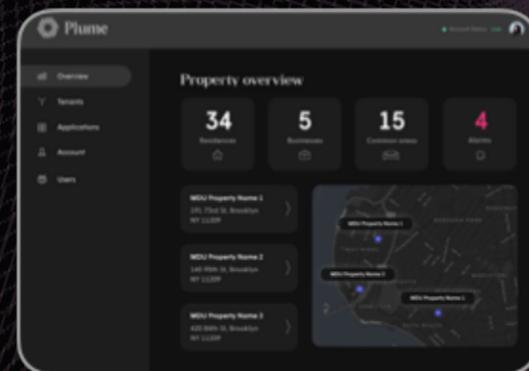

Improve the on-board/off-board tenant experience and gain greater efficiencies via the effective reuse of hardware.

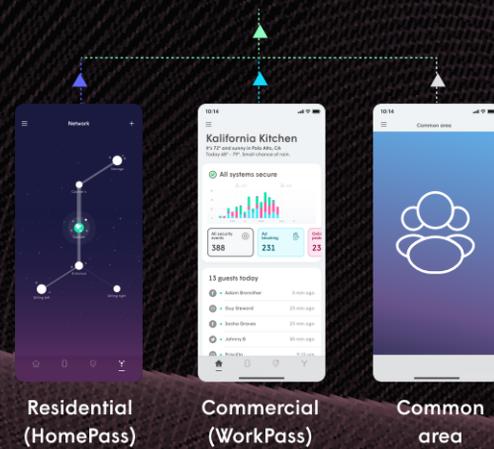

Improve operational efficiency

Gain better visibility with the web dashboard and eliminate the need for multiple tools and process.

Uprise helps ensure service providers and property managers can deliver the connected lifestyle tenants have come to expect.
